Education 2.0 Beta Release

For months I had been seeing questions about getting a college degree come up on this and other blogs. College for working adults and finishing your degree were becoming hot topics. It was becoming apparent that people wanted to finish their degree but didn't have the time or money to do it the traditional way.

About the same time my wife had friends ask us how our son (16 years old), and how he was already well on his way to earning his college degree. We thought it was common knowledge, but then one of her friends asked

"Can you teach us how?"

This one question got us thinking...why is no one doing this? It is so much quicker and easier than traditional school. It also costs far less.

In the end we wrote an ebook, added the necessary tools, and put together a program that took the guess work out of college. Don't get me wrong, you still need to study. You still need to earn your credits; this isn't a life experience, send us a check, and our diploma mill will send you a worthless piece of paper system! It is just a much better way to earn your degree.

We are now in the beta testing stage and are looking for a few qualified candidates. In return for your unbiased feedback you will get our program for free. We only have space for 5 more beta testers and it's first come first serve.

If you are interested email me at Education2-0Beta@Wealth-and-Wisdom.com. You will get a free copy of the ebook, the templates, and all the bonus material. In exchange all we ask for is your honest feedback.
